EDUCATION

Vikrant Group of Institute, <i>Master of Technology in Computer Science; GPA: 9.14</i>	Jan 2020 — Present
--	---------------------------

IPS college of Technology and Management, <i>Bachelor of Engineering - Computer Science and Engineering; GPA: 7.63</i>	Aug 2016 — Jun 2020
--	----------------------------

PROJECTS

reachingneighbors https://reachingneighbors.onprintshop.com	Oct 2021 — Present
---	---------------------------

- I learned a lot of new things while working on this project, such as how to use advanced JavaScript and how to integrate Zoho Book, ZOHO CRM among other things.
- I used a variety of technologies and tools in this project, including PHP, bootstrap, CSS, JavaScript, Docker, GitLab, CI/CD pipeline, QA, Deployment, and some third-party libraries.
- The big challenge in this project is uploading a big CSV file with millions of records and requiring read and write operations.
- There are some challenges during integrating Zoho Book and Zoho CRM, such as data not synching properly.

flamingodigiprint http://flamingodigiprint.com/	Apr 2022 — July 2022
---	-----------------------------

- This is my freelancer e-commerce website project, based on WordPress technology.
- Tools are used WordPress, ftp, git, GitHub.

m2printing

<https://shop.m2printing.nl>

Aug 2020 — Oct 2021

- This is another project based on printshop framework (<https://www.onprintshop.com/>) which is based on php technology and other frontend technology like bootstrap4, CSS, JavaScript, advanced library etc.
- Tools are used such as docker, svn.
- It is my responsibility to customize the site as per client requirements.
- I worked with a team of 3 software engineers, and we directly reported to the project lead on a daily and weekly basis.
- I also worked closely with the Tech Lead, UX team, and QA team to strategize product design, implementation, and testing.

Fortusis - Kwik Kopy Enterprise

<https://fortusis.com/>

Aug 2020 — Oct 2021

- In this project, I need to integrate the client's shop into Google Maps and show a customer Google Map on the website.
- Search by shop name, search by pin code, change map icon, and so on.
- The site can't be open without the branch being selected. That means the user comes from another site to the site with the branch id. If a branch is available on our site then the site is accessible; otherwise, it will go back.
- During development of the site we have to create one staging site in docker as require environment like php version, to testing install the ssl etc.
- I used a variety of technologies and tools in this project, including PHP, bootstrap, CSS, JavaScript, Docker, Git Lab, CI/CD pipeline, QA, Deployment, and some third-party libraries.
- PHP was used to implement high-quality code back end, bootstrap4, JavaScript, jQuery and other third party library are used for front-end design while SQL was used as the database, on the system's back end.
- Customizing the Google Map is a significant difficulty for me.
- I did some research and read through the Google Maps documentation on the internet.

imagemagic

<https://www.imagemagic.com.my>

Aug 2020 — Oct 2021

- It is my responsibility to update their website and customise a few minor features for this project, and I handled the entire process from development to deployment.
- This is a multi-store site with multiple corporate, franchise, and branch.

CERTIFICATIONS

Google My Business - Google,	27738060
Google e Web Designer Basics - Google,	27738615
Certified in 'C++ programming language' online exam conducted remotely by IIT BOMBAY,	1444170407
Jio digital champions - Jio,	CIN 11743735
Certified in 'Node JS Beginner' Upskill Program by Radixweb,	

ACHIEVEMENTS/EXTRACURRICULAR

- Build a own Web server on AWS EC2 and launch the website.
- Develop own Android app and Publish on Play store.
- Develop own Calculator chrome extension and publish on Chrome web store.
- I am a mentor for the junior member of my team and a trainee at Radixweb to train new hires.
- Similar to php artisan in laravel, create a CLI tool that automatically generates files in OnPrintShop technology.
- Have worked with multiple integrations integrated payment gateways and worked with Amazon Web Services.
- Have worked with multiple programming languages and know what works where, best
- Have created themes and plug-ins for tools like OnPrintShop, WordPress, Laravel.
- Have a good knowledge of Composer, OOPS and Design pattern.
- Love to challenge yourself by working on new frameworks and problems.
- I am a quick learner, self-learner, and hard worker, Because of all the talents I have mastered on my own.
- I Have 3-year experience as You Tuber, and Beginner in Blogger.
- Learn Node js and Create API in for event management and Product Management.
- Knowledge and Interest in Salesforce Developer (<https://trailblazer.me/id/msrajawat>).
- Desktop Support Skills.
- Experience programming in C, C++ Python. (In C and C++ Implement Basic Data Structure and OOP Concepts), (In python Implement OOP Concepts and Fronted (Using Tkinter GUI library) and Backed (implement by MySQL) for simple software design like Notepad, email sending software, Basic Employee registration system).
