

1. Tell me about yourself.

Ans.: I am a professional full-stack developer. Currently working at Radix web Ahmedabad. I have over 4 years of work experience and I've completed my Bachelor of Engineering degree in the field of computer Science in 2020 from IPS College Technology & management Gwalior. Being a part of a Radixweb, My Responsibility to Deliver customize the software according to the client Requirements. Well, coming to my skill set I've Hands-on experience in php and web development related technologies. And I'm good at Linux, version control tools like svn and git, also Hands-on experience on AWS-ec2 and Dockers. I'm looking for Product Development jobs where I can use my technical and research skills. I'm also interested in working with diverse teams in an inclusive work environment.

Thank you!

2. Why are you looking for a job change? OR

Why do you want to work for our company? OR

Why do you want to work here? OR

Why should we hire you? OR

Why do you feel that you are the right fit for his job?

Ans. Growth, I'm currently learning about servers like AWS, but I don't have a platform to put my knowledge to use.

OR

As you hire for full stack development, I have a skill set that matches your needs. I can also put in some more effort for your company if your company giving me chance to utilize my knowledge.

3. Why Did You Choose a Career in Software Development?

Ans. I want to be a software developer because use my creative and problem-solving skills. They must be imaginative, in tune with industry trends, and constantly upskill themselves to ensure a rewarding career path. They are expected to learn every day, which in turn helps them gain a competitive advantage in the job market as they accumulate valuable experience.

4. Tell me about a time you showed leadership.

Ans. To train the new joinee or guide the junior and take the initiative to research and analysis the company software where we are work its OnPrintShop.

5. Where do you see yourself in 5 years?

Ans. In the next 5-10 years, I hope to be leading a team or department. I've always enjoyed leadership in my career, so growing as a leader is one of my core career goals right now. Your job posting looked exciting and mentions some great leadership opportunities, so I was eager to have a job interview and learn more about this opportunity.

OR

In five years, my goal is to successfully obtain two certificates that are related to my position. I took some time to review your website before this interview, and I noticed that you offer your employees education advancement opportunities that include pursuing certifications to further their careers. Using the resources your company provides its employees, I truly believe that I can pursue my career goals and eventually move into a management position within your organization over the next few years.

6. What is your short term and long term goal?

Ans. My short term goal is to get the certification of server architecture and implement it to the live project hope your company give me this opportunities.

7. What is your strength and weakness? OR Tell me about a time you had to handle pressure.

Ans. Strength:

Analytical skills, Communication skills, Leadership skills, Ability to work in a team, quick learner, works well under pressure. (At a point I was the only Developer in my team with My Reporting head I had to manage the multiple projects at the same time with deadline).

Weaknesses:

- * I trust too easily.

- * I overthink everything.

8. What would your co-workers say about you?

Ans. My co-workers would describe me as an organized, thoughtful person who works well under pressure. So much of what I enjoy about doing logical work is creating a well-organized environment and anticipating the needs of my co-workers to make office life run as smoothly as possible.

9. Describe your most challenging project.

Ans. Reaching neighbors (zoho integration or CURD operation on large CSV file), colorflex (Generate Barcode) challenge is occur due because I need to work on core JavaScript with DOM manipulation and use web storage.

10. If you were stuck in solving a technical problem, how would you ask for help?

Ans.: if an organization has any particular protocol to communicate then I will follow that protocol otherwise I will directly communicate to the respective senior for the help.

11. Tell me about a time you disagreed with someone.

Ans. I will discuss the problem and try to find the alternate of the issue. Such as once upon a time when I integrate the zoho crm with our system and there is issue is generated and as client want which not possibly practically or its also not in the scope documentation then I disagree with the client and my reporting head and I just discuss on that issue and give the alternative solution.

12. Tell me about a time you created a goal and achieved it.

Ans. Recently, I set a goal for myself to learn AWS cloud and deploy a personal website on that platform, and I accomplished it. Similarly, I set a goal and achieve it such as Publish personal Android app on play store, publish chrome extension, learn node JS or react JS to become full stack developer, and Became you tuber.

13. Tell me about a time you surpassed people's expectation.

Ans. Similar to php artisan in laravel, create a CLI tool that automatically generates files in OnPrintShop technology.

14. Tell me about a time you had to learn something quickly.

Ans. I have done my node js certification from upskill program in 15 days.

Learned stored procedure for the client's project with in 2 Days.

15. Tell me about a time you had to manage conflicting priorities.

16. Describe your leadership style.

17. Tell me about a time you failed or made a mistake.

18. Tell me about a time you worked with a difficult person.

19. Tell Me About a Software Development Project You Completed Successfully.

20. Please share an example of effective teamwork that you've initiated.

21. Please share an example of a time you resolved a conflict within your team.

22. What do you do when you need to admit your mistakes?

23. Compare yourself now, and five years ago. How have you changed as a person?

24. When you enter a new workplace, how do you go about meeting and developing relationships with your new co-workers and your supervisors?

25. How do you feel about criticism? Is it important to criticize colleagues? Can you handle criticism?
26. How you prioritize tasks for a project?
27. What escalation paths do you use?
28. What sort of project management tools do you use?
29. What kind of architecture do you prefer to use?
30. What are the most important points to consider while you do development?
31. Career Objective

CV :

Dear Ms. Smith:

Are you searching for a software engineer with a proven ability to develop high-performance applications and technical innovations? If so, please consider my enclosed resume.

Since 2020, I have served as a software engineer for Radixweb, where I have been repeatedly recognized for developing innovative solutions for multimillion-dollar, globally deployed software and systems. I am responsible for full lifecycle development of next-generation software, from initial requirement gathering to design, coding, testing, documentation and implementation.

Known for excellent client-facing skills, I have participated in proposals and presentations that have landed six-figure contracts. I also excel in merging business and user needs into high-quality, cost-effective design solutions while keeping within budgetary constraints.

My technical expertise includes cross-platform proficiency (Windows, Linux); fluency in 13 scripting/programming languages (including php, JavaScript, jquery, Ajax, nodejs, react, C, C++ and SQL, API integration, REST API, Bootstrap, HTML5 (Index dB, Local Storage, websql, manifest, progressive web app or offline web app, service worker, cache api), CSS3, Linux, Word Press, (modules, exports, require, promises, synchronous, Asynchronous, call back) ,Python, Version control tools (svn, git, gitlab, gihub), aws ec2 Framework Laravel 8, CodeIgniter, Word Press) and advanced knowledge of developer applications, tools, methodologies and best practices (including OOD, client/server architecture and self-test automation).

My experience developing user-friendly solutions on time and on budget would enable me to step into a software engineering role at XYZ Company and hit the ground running. I will follow up with you next week, and you may reach me at (215) 555-5555. I look forward to speaking with you.

Sincerely,
Mayank singh kushwah
